

Dirk von Bracht

Climate and Energy Manager, City of Dortmund

Dirk is Climate and Energy Manager of the City of Dortmund. He is in charge of developing municipal climate protection projects, their implementation and perpetuation within the city administration. Dirk is committed to international, regional partnerships and intercommunal projects and is a multiplier for climate protection actions.

His portfolio includes sustainable commercial and industrial area development, cost and risk assessment of climate protection projects, concept development and the continuation of pilot projects. His goal is to consolidate sustainable climate protection in action and to demonstrate that climate protection measures also offers clear economic advantages.

Dirk has been working for the City of Dortmund as a Climate and Energy Manager since 2016 and has a broad knowledge of mechanical and plant engineering, especially in conventional power plant technology. He also has extensive knowledge and experience in process and organizational development. This enables him to develop projects in an integrated manner and to plan them in an implementation-oriented way.

Dirk studied at the Niederrhein University of Applied Sciences and graduated in Engineering and Business Administration (Dipl. Wirtsch.-Ing.).
